

GOLD Universal Joints

Neapco® Premium Quality Universal Joints

- 1310 - 1550 Universal Joint Series
- Lubricated for Life - High Performance Sealing System
- Meets OEM Performance Standards
- Covered by Neapco's "Extended Warranty"
- Backed by Neapco's Superior Customer Service
- Available for Immediate Shipment

GOLD Universal Joints

Features	Benefits
Cold formed solid high strength alloy steel journal forging.	Superior strength under load and fatigue.
All journals and bearing cups are carburized heat treated.	This process provides long life, superior strength, and durable wear surfaces.
Precision step ground shoulder with blended radii at all transitions.	Micro finish sealing surfaces and the elimination of stress riser points.
Precision end ground solid journal with reservoir.	Superior size control and uniform volume lubrication reservoirs.
Polymer Thrust Washers between the bearing cup and journal.	Superior balance ability and tighter lock-up. Eliminates metal to metal contact. Thrust washers allow a tighter fit without the risks of excessive friction between the bearing and the end of the journal. The superior end fit permits a better initial driveshaft balance and a longer lasting balance.
High Performance Multi-Lip Sealing System.	Superior sealing system keeps contaminants out and lubrication in. Reduces both operating and maintenance costs.
Bearing cups are precision ground on all contact surfaces.	Superior fit, lock-up, and balance ability.
High Performance Synthetic Grease.	Engineered and lubricated for life. Outstanding corrosion protection. Excellent mechanical stability. High load carrying properties. Excellent thermal stability. Outstanding resistance to water.
